NOTE: Aluminum roofing, or other metal roofing treated with aluminum paint, may be substituted for t&g roofers and slate surfaced roofing.  Wire for floor...1/2" mesh, 16 gauge for wire galvanized after weaving, or 1"x2" 16 gauge electrically welded wire.  Wire for sides...1/2" mesh, 18 gauge, galvanized after weaving.  1"x1" boards, set on edge between runners at ends of shelter, will prevent entrance of chickens under floor.  During cold weather, provide covers of % plywood for 3 sides.  Burlap bags, building paper, etc., may be substituted.
